

PROFILE

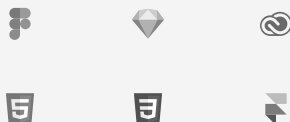

I am a UX researcher and UX/UI designer based in Bogota, Colombia, with over 20 years of experience in software products. Additionally, I am a professional musician with more than 40 years of experience.

I see music in design and design in music. These two facets of my life continually enrich each other, shaping my work as an ongoing process of growth and innovation—one that enables me to create meaningful experiences and improve people's lives.

LANGUAGES

Spanish (N), English (B1) and Italian (I).
